Message from

Director General, CPWD

Dear Colleagues,

The month of October has brought the joyous festival of Deepawali, which I am sure, would have been celebrated by all of us with great zeal and festivity.

There is no doubt that good work done by you is being appreciated by our esteemed clients and stakeholders. Many of us have been able to set an example as to how the team spirit and dedication can work wonders for the organization; however, we are also receiving displeasure communications from many of our clients, which is a matter of concern. We need to come out of complacency, revisit our weaknesses, improve our efficiency and deliver quality construction and services in time. There is no magic wand to achieve the desired results except to give our best through our hard work, professional acumen and commitment.

At my level, I am making extensive review of the functioning of the Department through daily meetings with the Officers in the Directorate and through weekly national level video conferencings, where we also invite our clients for on the spot redressal of their issues. Being the market leader of the construction sector, we need to keep pace ahead of time. It is very important that we set our priorities straight and constantly realign ourselves to ever changing scenario, while ensuring that our focus on growth and achieving excellence remains undeterred. We will have to continuously evolve in all spheres of our activities and keep ourselves abreast with the latest technologies and best construction practices. We will also have to carve our future road map with all round growth as our 'Mantra'.

The ongoing calendar year 2019 will shortly draw to a close; the experiences gained during this year, should spur in us to face New Year with confidence and renewed vigour. I exhort you to gear up for the New Year ahead, be open to new ideas, to dawning needs & change and work together with passion and commitment to take the organization to greater heights.

Thank you,

A handwritten signature in blue ink, appearing to read 'Prabhakar Singh'.

PRABHAKAR SINGH

IMPORTANT EVENTS

Shri D.V. Sadananda Gowda, Hon'ble Minister of Chemicals & Fertilizer inaugurated Institution Building of CIPET, Kochi on October 31, 2019 in the august presence of Sh V. Muraleedharan, Hon'ble Minister of state for external Affairs and Parliamentary Affairs.

Hon'ble Minister complimented CPWD for the excellent work and praised for good work being done by them for various CIPET buildings.

IMPORTANT EVENTS

Illumination of National Police Memorial, New Delhi with dynamic façade lighting and sound system by CPWD on Police Martyrs' Day on October 21, 2019.

Shri Y.S. Jagan Mohan Reddy, Hon'ble Chief Minister of Andhra Pradesh inaugurated Academic Building for CIPET at Vijayawada, Andhra Pradesh on October 24, 2019 in the august presence of Shri D.V. Sadananda Gowda, Hon'ble Minister of Chemicals and Fertilisers.

Academic Building for CIPET, Vijayawada

IMPORTANT EVENTS

Shri Narendra Singh Tomar, Hon'ble Minister for Rural Development, Panchayati Raj, Agriculture & Farmers' Welfare laid foundation stone of ASRB office building at IARI Pusa, New Delhi on November 04, 2019, in the presence of Sh S.C. Bhardwaj, ADG (Region Delhi) CPWD.

Smt. Meenakshi Lekhi, Hon'ble Member of Parliament inaugurated two open Gyms developed by CPWD at Budha Jayanti Park, New Delhi on October 21, 2019.

IMPORTANT EVENTS

CPWD brings Innovative Training Policy and Design Policy of the Department

CPWD brought out much awaited Training Policy and Design Policy of the Department for implementation in the Department. Implementation of comprehensive Design Policy will help the individual officers of all streams to gain enough expertise to undertake majority of the design works in-house. Enactment of Training Policy of the Department will ensure that the legacy of the Training that has been in place in CPWD continues to improve and grow to match the pace the industry is growing in.

Shri Prabhakar Singh Director General CPWD released Training Policy & Design Policy of CPWD and e-version of Training Calendar 2019-20 prepared by National CPWD Academy on Oct 23, 2019.

विषय: श्री अजय कुमार अग्रवाल जी.

As you are superannuating on October 31, 2019, I wish to express my profound ovation to your valuable contributions for the Department during over 33 years of your illustrious service in different capacities in CPWD. I am sure that being a part of big CPWD family for over three decades, must have been an extremely enriching experience for you.

I take this opportunity to convey my heartfelt deep appreciations to you for your professional acumen, objectivity, positive attitude and dedication, with which, you have served the Department. I have no hesitation to say that with your superannuation, the Department will be losing a bright and illustrious officer.

I am confident that even after leaving the department, you shall continue to benefit us from the treasure of your rich experiences and extend your support to the Department whenever needed.

I wish you a very happy, healthy, peaceful post retirement life and success in all your future endeavours. May the choicest blessings of the almighty be showered upon you and your family members in all times to come.

स्वागत,

अजय कुमार अग्रवाल

Interview with Prabhakar Singh

"CPWD has shifted towards new technology and delivery standards"

In an interview with *Indian Infrastructure*, Prabhakar Singh, Director General, Central Public Works Department (CPWD), shares his view on the accomplishments of the CPWD, various initiatives and measures taken to improve transparency in operations and welfare of workers, new technological improvements, and key challenges facing construction contractors, and shares his vision for the growth of the CPWD over the next five years...

What have been the key accomplishments of the CPWD in the past few years?

The CPWD carries out operations both domestically as well as internationally. Among the many global projects being developed are a psychiatric hospital in South Sudan, a police academy in Myanmar and hospitals in Nepal. Domestically, the largest net-zero energy consumption building (fully solar energy compliant) – Paryavaran Bhawan – was developed in Delhi. Apart from this, the Dr Ambedkar Memorial was constructed in a span of only two years using advanced technologies. The CPWD has also managed to complete the Western Court building before time, saving around Rs 200 million in costs. Further, several buildings for the banking sector including the gold-rated building of the Punjab National Bank in Delhi was developed.

Administrative changes have also been made to make the CPWD a work-friendly organisation. For this, a 560-page manual has been rewritten besides delayering of the organisation (reducing the levels of hierarchy from seven to four) and delegation of powers to clearly define authority and responsibility.

Another key accomplishment is the humongous increase in work orders from Rs 0.2 trillion to Rs 1.5 trillion, as the CPWD's performance in terms of time and costs is 30-40 per cent more efficient than any other agency's. To further enhance capabilities, the CPWD is trying to engage and invest more in research and development.

What has been the order inflow of the CPWD in 2018-19?

Currently, the order inflow is more than Rs 1.5 trillion and is expected to touch Rs 3 trillion in the near future.

How has the CPWD evolved over time?

"In the coming five years, the growth rate of the CPWD is expected to rise by 25 per cent annually."

Since Independence, the CPWD has been involved with the development of the capital city and national infrastructure. It has taken a quantum jump recently, leading the developmental work of the country and providing guidance by playing the role of a principal technical adviser.

What are the new initiatives and measures that have been taken to improve transparency in operations and speed up the decision-making process?

Several measures such as elimination of corruption at each level of the organisation and digitalisation of processes, the first such feat by a civil organisation, have been taken. Within a year's time, the entire organisation is expected to become totally paperless and digital with the introduction of enterprise resource planning software. Initiatives are also being taken to enhance clarity in terms of decision making for project managers, with responsibility and authority delegated to them.

Further, steps are being taken to eliminate chances of any delay in operations. In case decisions get delayed, they get directly transferred to the next higher authority. The CPWD is also moving forward with the adoption of new technology and greater innovation. The time taken for construction of houses has been improved to two houses per day. Further, with innovative technologies, in 2018, the iconic Atal Samadhi was developed in about 42 days. Apart from this, another project for connectivity of the flyover/ underpass between the Northern Mahipalpur bypass road and airport

road was completed in a short period of about 13 months (without impacting traffic movement even for a single day), thus reducing the cost of the project by up to Rs 260 million.

What are the steps being taken to promote new and environment-friendly materials and technologies?

There are mountains of construction and demolition (C&D) waste lying in and around Delhi. Taking this into consideration, an experiment was performed on the Supreme Court's project, wherein about 2 million blocks made out of C&D waste were used, saving about Rs 600 million in the project cost. Apart from this, so far around 1,100 rainwater harvesting (RWH) systems have been installed in the country. Also, RWH systems have been made mandatory for all buildings being developed by the CPWD. LEDs and solar rooftop power plants (on 550 buildings) have also been installed in CPWD buildings and are currently being installed in government buildings as well. With the scale of deployment of solar rooftop plants, the CPWD has managed to produce 8 MW of energy. Recently, an energy-plus campus was inaugurated in Dandi, Gujarat, where energy production is greater than consumption and, therefore, the excess energy is supplied to nearby villages.

What are the steps that have been taken to promote the welfare of workers who are executing the projects?

The CPWD has signed an MoU with the CPWD's Officers' Wives Association that provides crèche facilities at various construction sites all over the country. It also organises health camps for workers on construction sites. Further, steps are being taken to enhance the skill of the workers by providing skill training to at least 30 per cent of the unskilled workers engaged in projects. Training certificates are also being provided to enhance the potential for future employment. Online payments are made to contractors to ease project execution.

Does the CPWD play a role in the implementation of centrally sponsored programmes

such as the Smart Cities Mission, Housing for All, etc.?

As programmes such as the Smart Cities Mission and Housing for All, among others, are designed to be executed by state governments, the major part of the funding comes from the central government. Thus, the CPWD is not directly involved in their execution but does play an indirect role. The CPWD was also appointed to the technical evaluation committee to assess the Global Housing Technological Challenge. Here, the CPWD evaluated the technologies used for constructing six lighthouse projects that can be replicated by others in the future.

What are the specific issues and challenges faced by the CPWD while working with contractors and different technology partners?

"Clients have always been quite unreceptive towards contractors and they are not treated as partners. There is an urgent need to bring in a change in the mindset of people towards contractors."

The key challenge is with respect to the quality of contractors, and this needs to be worked upon. Further, there is lack of knowledge on the part of the engineering, procurement and construction contractors as they lack management training as well as technical skills.

What are the strategies that should be adopted to address these issues?

Clients have always been quite unreceptive towards contractors and they are not treated as partners. There is an urgent need to bring in a change in the mindset of people towards contractors. The CPWD is already trying to break the barrier by rewarding contractors along with officers for on-time completion of projects because the success of projects requires efforts by all three parties involved – officers, contractors as well as clients.

Where do you see the CPWD in the next five to 10 years?

The CPWD has prepared a five-year vision document, which proposes a number of initiatives, including the creation of special purpose vehicles to execute redevelopment works through alternative funding. In the coming five years, the growth rate of the CPWD is expected to rise by 25 per cent annually. There are also plans to make only sustainable buildings going forward. ▀

NEW REFORMS AND INITIATIVES BY CPWD

Seven more technologies in respect of E&M services have been approved for adoption thereby till date, total thirty six new technologies have been approved for adoption in CPWD.

It has been made mandatory to finalize the rates of extra item/ substitute item / deviation by the competent authority before execution of the same.

It has been made mandatory to exercise exhaustive pre-industry consultations for special / large value works before issuance of NIT/bid for these works.

It has been decided that clients shall be made party in acceptance of arbitration award and accordingly, necessary guidelines issued.

All new projects of CPWD costing 50 crore and above shall be mandatorily registered for green certification - GHAR in accordance with CPWD Green Rating Manual.

As a part of Human Resource Development, a relative ranking system for the CEs/SEs on the basis of their performance has been introduced. This exercise is required to improve the efficiency and productivity of the department.

Suggestions / ideas / innovations from everyone in CPWD have been invited for achieving the excellence in the functioning of the Department. Good response has been received in this regard.

In pursuance to the clarion call of Hon'ble Prime Minister for "No to Single-Use Plastic" in the Country, a Massive Public Awareness Programme has been launched by the CPWD across the country.

NEW REFORMS AND INITIATIVES BY CPWD

In pursuance to Directives of PMO for providing hygienic living conditions to construction workers, CPWD Develops Standard Modules for workers shelter at construction sites.

CPWD being a Principal Engineering Organisation of Government of India was given the task of developing standard designs and specifications for construction worker's shelters at the construction sites by the PMO.

CPWD undertook above task in most diligent and professional manner and developed standard modules of the shelters, which were seen by the PMO. These designs and specifications of shelters have been circulated to all CPWD field units for erection at their work sites. These shelters, when provided at sites will facilitate the workers comfortable and habitable living conditions at sites.

NEW REFORMS AND INITIATIVES BY CPWD

CPWD takes a giant leap on promotion of Innovation, Research and Development

CPWD as a result of its renewed efforts to expand its outreach and work arena signed Memorandums of Cooperation with two professional Bodies - Indian Society for Trenchless Technology and International Council of Consultants on November 05, 2019 in the field of mutual interests related to promotion of innovation, research and development and adoption of best practices in the field of trenchless technology and providing advisory assistance in construction & arbitration.

MoC signed in the gracious presence of Shri Prabhakar Singh, Director General, CPWD, Dr. P. R. Swarup, President International Council of Consultants and Dr. Niranjana Swarup, Director General, Indian Society for Trenchless Technology.

WORK PORTFOLIO

- Ministry of External Affairs, reposing its faith on CPWD entrusted the work of National Police Academy, Nepal costing Rs. 670 Crore.
- Central Board of Indirect Taxes & Custom assigned the works of Office Complex and Residential Quarters costing Rs. 975 Crore in Mumbai to CPWD.
- IIM Calcutta entrusted the works costing Rs. 250 Crore to CPWD.

NEW MoUs

MoU signed between CPWD and Dehradun Smart City Ltd. for construction of green building project of DSCL Dehradun, costing around 180 Crores on October 21, 2019.

MoU Signed between CPWD & Mahatma Gandhi National Council of Rural Education (MGNCRE) for Construction of Various Buildings at Hyderabad on October 23, 2019.

MoU signed between CPWD and Indian Institute of Petroleum and Energy, for development of their permanent campus at Visakhapatnam on October 18, 2019.

Dear Shri Prabhakar Singh,

1. I was allotted Park - 9B, Khalini in an extremely dilapidated state on 12 July 2019. The structure and the interiors were in an extremely poor condition and highly unsuitable for living. In a short span of time, through meticulous planning and close supervision, the team of CPWD, Shimla Circle did a commendable job by not only carrying out major repairs but also improving the interiors of the house.

2. The house has been made safe and comfortable with efforts of Shri Bans Raj, Assistant Engineer and Shri Anupam Tyagi, Junior Engineer. I am writing to specially express my gratitude to CPWD and compliments to the staff of Shimla Circle.

*with profound regards,
yours sincerely,

Sub: Outstanding Services of CPWD in IIT Ropar Campus.

Dear Sh. Singh,

I am really thankful to the whole team of CPWD executing the construction works of IIT Ropar. Recently, the institute campus was flooded due to heavy rains in Himachal and Punjab. During this time, the CPWD team led by Sh. Gurbax Singh, Chief Project Manager has done an outstanding job in restoration of affected services in the campus within a limited span of 10 days. The whole team of CPWD stood whole heartedly with IIT Ropar, owning the institute as their own.

The services rendered by the team are appreciable. Once again, I am thankful to your organization and the team for supporting the institute during tough time.

Thinking You,

Yours faithfully

Vigilance awareness pledge at Bangalore

SALIENT FEATURES OF PROPOSED GRAMEEN VIKAS BHAWAN

ASHU CHAUDHARY
Architect, Tech & PR Unit

Grameen Vikas Bhawan will be the new headquarters for the Ministry of Rural Development with the aim to have single operation centre for planning and implementation of rural development schemes all across the Nation. Grameen Vikas Bhawan has been designed as modern and green building with the project cost of Rs. 361 Crore. The State-of-The-Art Building will be completed in two years time i.e. by July 2023.

UNIQUE FEATURES OF THE PROJECT

The Bhawan consists of 2 Basements, Ground Floor and 9 Upper Floors. The Double Basement space used for parking 592 Cars with mechanised two tier parking facility in second basement and services.

Proposed superstructure house offices for the Ministers at 8th floor, offices for Secretaries at 7th floor and offices for Joint Secretaries at 5th floor for efficient working.

The state of the art Auditorium having Seating capacity of 500 on top Floor along with Conference Rooms etc.

General facilities viz. ATM, Bank, Kendriya Bhandar, etc. provided on the Ground Floor for the convenience of occupants of the building.

The double height atrium with dome and structural glazing marks the grand entrance to the Bhawan.

Art work on the external facades finely blends modern architecture with theme of rural India.

Other facilities such as a Central Government Health Scheme (CGHS) dispensary, bank, post office and a creche for the employees' children are also provided in the Bhawan.

Plot area	14000 Sq mtr.
Total built-up area	57000 Sq mtr.
Ground floor area	3755 Sq mtr.
Typical floor area	3566 Sq mtr.
Basement area	21454 Sq mtr.

GREEN FEATURES OF THE BHAWAN

- Complying to highest achievable Green Rating.
- Use of green building products such as Fly ash in concrete, pavers, AAC Blocks etc. made out of recyclable materials i.e. C&D Waste.
- Maximum use of Portland Pozzolona Cement in Masonry and other construction works.
- Use of Energy Efficient Equipment's such as LED lights inside the Bhawan to reduce the consumption of electricity.
- All measures adopted for Dust mitigation, noise generation during construction.
- Proper arrangements for water and energy conservation, the building will not only generate 250 kilowatt of solar power, but also reuse 200 kilolitres of water everyday for gardening and cleaning purpose.
- The horticulture and landscaping works.

Centrally Air-Conditioned Bhawan has provisions for fire safety, CCTV cameras Cable TV, Dish Antenna System and access control for security and DG sets for 100% power backup. Accessible India features, public address system and electrical signages and display are the important services in the Bhawan.

The walls of nine-storey Bhawan display the rich cultural heritage and daily life in villages.

ACTIVITIES OF CPWD OFFICERS' WIVES ASSOCIATION

Diwali Celebration
at Hriday Kunj,
New Delhi

One day Health Check-up Camp for the Cancer Screening and General Health related problems of women organized by CPWD OWA on November 11, 2019 at Hriday Kunj, New Delhi. Shri Prabhakar Singh, Director General, CPWD graced the event. About 120 women came for screening in the camp and free medicines were distributed to them.

One day Free General health Check-up camp organised by CPWD officers' Wives Association at CPWD construction site of Boy's hostel at MNNIT Prayagraj on November 9, 2019. Over 150 workers benefitted from the health camp.

One day Free General health Check-up camp organised by CPWD officers' Wives Association at CPWD construction site of Indian Coast Guard at Visakhapatnam in association with Team CPWD Visakhapatnam on Oct 19, 2019 in the presence of ADG, Region Hyderabad, CPWD. More than 200 construction workers were benefitted and free medicines were distributed.
