NEW YEAR MESSAGE FROM DIRECTOR GENERAL, CPWD

Dear Colleagues,

It gives me immense pleasure in wishing you and your families a very happy, healthy, prosperous and successful **'New Year 2024'**.

As the years roll by, each year brings fresh challenges, new opportunities and motivation to achieve greater heights. I earnestly hope that the New Year will see you achieve the goals that you have set for yourselves, both on professional and personal front.

We have completed many projects in the past year. Some of them are: New Parliament Building, Permanent campus of IIT Dharwad; New Helicopter Factory for HAL at Tumakuru; Skywalk at Shri Mata Vaishno Devi Bhawan; 500 Capacity Girls Hostel at IIT Kharagpur; Judges Library at Addl. Building Complex, Supreme Court of India; GPOA-2 at KG Marg & Redeveloped GPRA at Mohammadpur & Thyagaraj Nagar, New Delhi; GST Bhawan at Agartala, Tripura; New Corporate Office of Punjab & Sind Bank at Kidwai Nagar, New Delhi; Eklavya Model Residential School at Udaipur etc.

Several new organizations have joined our list of clients and many new MoU's were signed for execution of projects. I convey my warm wishes on New Year to all our clients, stakeholders and their families too.

CPWD has always been a pioneer in adoption of new technologies including various prefab construction technologies, Concrete cloth Technology, Monolithic Shear wall system, stay in place PVC Formwork, Light Gauge steel structural systems, pre-engineered steel structural system etc. Similarly new sustainable construction materials like Electricity producing concrete, Cement less concrete, concrete utilizing waste rubber, plastic waste, Bricks using recycled papers/ plastic waste/ solid waste/ rice husk/ coconut fiber etc. are being explored and experimented in CPWD.

It is a matter of great satisfaction that we are able to sustain the momentum of our growth through our continuous efforts by keeping our vision and mission clear and focused. I would also like to take this opportunity to express my appreciation to each one of you for your sincere efforts in implementation of various modules of ERP, which will go on to improve productivity and efficiency of the department as a whole.

CPWD is currently envisioning the widespread adoption of Building Information Modelling (BIM) in all our projects by embracing digital transformation to enhance project efficiency, effectiveness, reduce costs and improve the overall quality of construction and infrastructure projects. I urge everyone in the department to actively adopt and make the most of BIM in all our ongoing and future projects.

In the coming year, let's continue to build upon our strengths and learn from our experiences. Let's embrace new technologies, sustainable practices, and creative solutions that push the boundaries of construction excellence. We are one of the leading organizations that comply with core principles of ***Rights of Persons with Disabilities Act, 2016*** and ensure barrier free movement is achieved in the projects. We are already ensuring proper disposal and recycling of C&D waste in several of our projects as well as adopting dust control measures. All our buildings are design and constructed with green rating and we have been pioneers in adopting BEE policies for energy and water conservation. We have to innovate and improve to keep pace with the mechanization in the construction industry. Delivery of projects in time with quality is a challenge and it requires radical thinking to overcome it in order to meet client's satisfaction. Infact Secretary, MoHUA during his address on 12th July 2023, on quality and functionality of buildings, said *"Shift focus from being primarily structure-driven to MEP (Mechanical, Electrical, Plumbing) driven buildings. I don't think without MEP we are into cutting edge of buildings. The structure is something that is just surrounding the building now a days"*.

Always remember that the foundation we lay, the structures we build, and the spaces we create not only stand as physical embodiments of our craftsmanship but also contribute to the growth and development of our nation. As we embark on this new year, let's set our sights on new heights, always mindful that our success is built on a foundation of team work and collaboration.

I once again wish that the New Year brings happiness, prosperity and success to you all.

With best wishes.

(Rajesh Kumar Kaushal)
